

PMI Mass Bay Candidate Election Statement

Candidate: Nina Pang
Running For: Director-at-Large

Statement of Purpose

I am interested in providing and facilitating quality programs, training, and networking based on the needs and interests of our members and the communities we serve in – and encourage diversity, equity, and inclusion by creating a warm and nurturing environment for project management professionals from all walks of life.

I have been a volunteer with the Mass Bay chapter since 2019, and I am familiar with some of its professional development offerings and operations. I first served as a Speaker Ambassador for chapter meetings and workshops, next as a Program Manager, Online when the pandemic hit, and since February as a Lead of the monthly Life Sciences Roundtable which I launched in partnership with Hawkins Point.

Throughout my career, I have helped people grow by listening to their needs, reframing challenges, and nurturing support networks. As someone who made career pivots due to unexpected life events and also received help along the way, I can relate to that and am passionate about supporting others in their journey to further develop their core competencies and advance their careers in project management.

I believe that my experiences and growth mindset have prepared me to serve on the Board where I can represent our chapter's constituents, foster interconnectedness in our local PMI community, and be a thoughtful contributor towards our goals for the coming years – be they virtual or in-person.

Biographical Information

I am currently a Senior IT Project Manager at Thermo Fisher Scientific, world leader in serving science, where I manage and drive delivery of data governance and technology enablement programs that leverage cloud technologies to accelerate finance digital transformation.

I am an experienced finance business partner and program manager with 15+ years of experience at the intersection of finance, strategy, IT and operations across technology, life sciences, and industrials.

I aim to create business value, help enterprises become more agile and deliver continuous innovation, lead through change and uncertainty, and help people, customers, and organizations grow.

I began my project management career in 2000 and obtained my PMP certification in 2011. I earned a bachelor's degree in economics from Wellesley College, and a master's degree in materials science and engineering from Boston University. I serve on the Board of Wellesley College Alumnae of Boston as a Programming Co-Chair. I live in Greater Boston with my family, and enjoy running, listening to jazz, and traveling.
